The Federal Communications Commission 445 12th Street, SW Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I use a prepaid wireless phone because I can not afford to pay a deposit on a regular cell phone. I have two small children and I live an hour away from my employer, and with the cost of gas going up so much, and the increase of everything else we need some things kept to where we can afford them. Besides if you were to continue to raise the prices of everything people would probably just consider the rising cost to much of an inconvenience and have themselves disconnected, or just use their phones less than they do. please keep it affordable for all of us.

Sincerely,

bridgette morgan 941 n palm ave. fresno, California 93728
